

Product Data Sheet

Floating Suction Skimmer

Summary

The Floating 304SS Suction Skimmer has been intricately crafted to efficiently eliminate free-floating oil or hydrocarbons present on the surface of wastewater within a storage tank.

Featuring a fully adjustable and resilient Stainless Steel four-arm design with a 4" heavy duty ball float assembly, this skimmer effortlessly draws in the oil via 50mm inlet to a flexible vacuum delivery hose, directing it to a treatment system through a pump.

Not only is it a robust and enduring unit, but it also demands minimal maintenance, making it a cost-effective solution with a low investment

Product Specifications		
Weight		4.5Kg
Dimensions	Height	420mm
	Length	650mm
	Width	650mm
Throughput		Maximum 55L/min 3300 L/per hour
